

Muhammad Absar Siddiqui

Full Stack Software Engineer

Karachi, Pakistan | +92 330 304 7707 | absar.sid359@gmail.com | [Portfolio](#) | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Software Engineer specialising in full-stack development integrated with artificial intelligence. Focused on building production-grade SaaS systems that turn raw, unstructured data into structured, searchable, and actionable business intelligence. Experienced in frontend engineering, AI integration, REST API development, and solving real business problems across fintech, pharma, and knowledge-management domains.

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript (ES6+), TypeScript, React.js, Next.js, Tailwind CSS

Backend: Node.js, Python, REST APIs, FastAPI, Fastify

AI / Integrations: Google Gemini API, OpenAI API, LLM integration, prompt engineering

Tools & Databases: PostgreSQL, Supabase, Git, GitHub, Vercel, Netlify

WORK EXPERIENCE

Software Engineer | 360Xpert Solution

Oct 2025 – Present

- Leading end-to-end development of a Pharma CRM used by a sales team admin managers, built with Node.js and React.js.
- Translating business requirements into technical user stories and managing the product backlog across sprints.
- Coordinating API integration and feature delivery while writing production-grade frontend code.

Intern - IT | State Bank of Pakistan (SBP)

Jun 2025 – Aug 2025

- Analysed global third-party risk frameworks and proposed improvements aligned with Pakistan's regulatory environment.
- Collaborated with IT teams to benchmark local banking practices against international standards.
- Produced a written report adopted by the team as a reference document for ongoing compliance review.

Frontend Web Developer (Intern) | Bano Qabil

Dec 2024 – Mar 2025

- Built responsive user interfaces using HTML, CSS, and JavaScript for client-facing web applications.
- Developed modular React.js components that improved code reusability and reduced feature delivery time.

PROJECTS

IntelliTrade - Final Year Project - Node.js, TypeScript, PostgreSQL, Gemini API

- Built a multi-tenant SaaS platform that automates commodity trade discovery by parsing unstructured B2B broker emails with AI.
- Designed and implemented a custom Greedy Algorithm for real-time buyer-seller matching with order-splitting support.
- Delivered full system across 3-member team as a Lead Frontend Developer and Project Manager.

TacitVault AI - Python, FastAPI, Gemini API, Supabase

- Developed a Voice-to-Knowledge Management System that captures undocumented organisational expertise via voice input.
- Used LLMs to automatically structure captured knowledge into searchable SOPs and predict knowledge-risk areas.

Interactive Developer Portfolio - React.js, Tailwind CSS

- Designed and developed fully responsive personal portfolio showcasing production-grade SaaS systems and AI integrations.

Task Management System - React.js, Vanilla JS

- Re-engineered a self-built Vanilla JS app into a modular React architecture with Hooks-based state management.
- Added priority tagging and real-time search features, improving usability for teams of up to 20 tasks.

News App - React.js, REST API

- Built a real-time news application with dynamic routing, category filtering, and client-side state management.

EDUCATION

BS Software Engineering

2022 – 2026

Sindh Madressatul Islam University (SMIU), Karachi | Awaiting Final Result
