ABOUT ME

Software Engineer specializing in full-stack development integrated with artificial intelligence. Focused on building systems that understand human intent, turning raw, unstructured data into highly structured, searchable, and actionable business intelligence. Experienced in developing production-grade SaaS systems. Passionate about working at the intersection of frontend engineering, AI integration, and solving real business problems.

WORK EXPERIENCE

Software Engineer | 360Xpert Solution

October 2025 – Present

- Leading the end-to-end development of a Pharma CRM using Node.js and React.
- Translating business requirements into technical user stories and managing the product backlog.
- Coordinating API integration and feature delivery while writing production frontend code.

Intern | State Bank of Pakistan (SBP)

June 2025 – August 2025

- Analyzed global third-party risk regulations to suggest improvements for local banking practices.
- Applied analytical skills to understand the operations of financial regulators and the national banking sector.
- Collaborated with IT teams to align Pakistan's practices with international standards.

Frontend Web Developer (Intern) | Bano Qabil

December 2024 – March 2025

- Developed responsive user interfaces using HTML, CSS, and JavaScript.
- Built modular components in React.js to improve code maintainability.

EDUCATION

Bachelor of Science in Software Engineering (Awaiting for Result)

Sindh Madressatul Islam University (SMIU)
2022 – 2026.

TECHNICAL SKILLS

- **Frontend Development:** HTML5, CSS3, JavaScript (ES6+), TypeScript, React.js, Next.js, Tailwind CSS.
- **Backend Development:** Node.js, Python, REST APIs.
- **Tools & Databases:** PostgreSQL, Supabase, Git, GitHub, Vercel, Netlify.

PROJECTS

- **IntelliTrade — Final Year Project (Node.js, TypeScript, PostgreSQL, OpenAI)** Built a multi-tenant SaaS platform that automates commodity trade discovery by reading broker emails and using AI to extract data and match buyers with sellers in real time.
- **TacitVault AI (Python, FastAPI, Gemini API, Supabase)** Developed a Voice-to-Knowledge Management System that captures undocumented expertise via voice and uses LLMs to structure it into searchable SOPs and predict knowledge risks.
- **Interactive Developer Portfolio (React.js, Tailwind CSS)** Designed and developed a highly responsive, modern personal portfolio website to showcase production-grade SaaS systems, AI integrations, and professional milestones.
- **Task Management System (React.js, Vanilla JS)** Re-engineered a self-developed Vanilla JS app into a modular React architecture, optimizing state management with Hooks and adding priority tagging and search features.
- **News App (React.js, REST API)** Developed a real-time news application with dynamic routing, category filtering, and state management.
